Sure-Lok pipe provides a secure joining system and a rubber gasket for soil-tight and silt-tight connections that assure alignment and reliability.

Sure-Lok pipe delivers excellent value and performance, with significant cost, money and time savings. Other benefits include its availability in 20'(6m) lengths; superior chemical and abrasion resistance; savings on labor, installation, equipment and rehab/replacement; and the pipe's light weight allows for safer job site handling and helps reduce accidents.

- Diameters: 4" - 60" (100-1500mm)
- Length: 20' (6m) for 4" - 30" (100 - 750mm) diameter pipe
20.5' (6.24m) for 36" - 60" (900 - 1500mm) diameter pipe
- Specifications: AASHTO M252, Type S
AASHTO M294, Type S
AASHTO MP7
- Joint Performance: Leak-resistant, silt-tight
- Joining system: Bell-and-spigot
- Gasket: Rubber, meeting ASTM F477
- Fittings and Accessories: Hancor manufactures a full complement of fittings for all diameters of Hancor pipe.
